Experimental Particle Physics, Astrophysics/Particle Astrophysics/Cosmology

Posting updated to include diversity:

The School of Physics and Astronomy at the University of Minnesota invites applications for tenure-track Assistant Professor positions in each of three areas, Experimental Particle Physics, Astrophysics/Particle Astrophysics/Cosmology, and Theoretical Particle Physics.

Required/Preferred Qualifications/Job Duties (Must be mentioned on application/resume):

Candidates are required to have a Ph.D. in physics. Successful applicants are expected to have at least two years of postdoctoral experience in the field and must have demonstrated the potential to conduct vigorous and significant research programs and the ability to collaborate with researchers with a wide range of viewpoints around the world. The ability to teach physics effectively at both the graduate and undergraduate levels to a diverse group of students is required. The ability to enthusiastically attract students to the field of physics including those students who traditionally have been underrepresented in the STEM fields. Senior applicants may be considered for tenured appointments if they have a demonstrated record of accomplishment, scientific leadership and creativity and the proven ability to support the University's commitment to equity and diversity.

The School has strong programs in each of the fields in which candidates are being sought. Detailed information may be found at www.physics.umn.edu which is the School's web site. The starting date for these positions could be as early as late August 2009, which is the beginning of the 2009-2010 academic year.
